Providing the missing piece in your Condition Based Monitoring platform

- Modular design; full customization of monitoring parameters to meet specification
- Reduce installation and reconfiguration time; web based software and plug and play modules
- Field upgradeable; hot swappable modules with wiring on the front panel of the unit
- Multiple chassis sizes and mounting options to suit any application

Product Summary

Description As industry trends continue to require higher transformer utilization with reduced operations and maintenance budgets, it is becoming vital to reliably monitor asset health in real time. Real time monitoring of important parameters such as traditional transformer main tank / LTC / cooling systems, partial discharge, dissolved gas analysis and bushing health may indicate early warning signs of potential risks to the electrical network and associated assets. Early detection of transformer abnormally may allow for a shorter issue resolution cycle and avoidance of unnecessary maintenance or even potential unplanned outages.

Application Transformer monitor for condition based, continuous online monitoring of asset health (CBM). Interfaces with a variety of Qualitrol and third party smart sensors, as well as traditional gauges to accurately measure transformer parameters vital to asset management. The QTMS utilizes a modular approach allowing for full system customization to specification. Modules are hot swappable and field upgradeable. Web based software is specifically designed for ease of unit commissioning and setup.

Bring ALL sensor data into one monitor
Asset Health

Reliably monitor asset health in real time

- Individual modules allow for complete QTMS customization
- Certain parameters such as dissolved gas analysis (DGA), partial discharge (PD), and 3rd party sensors can be brought in via communication ports

**LTC LOAD TAP CHANGER**
- Contact wear status
- Current position and range
- Tap run time and count
- Motor current power
- Motor actuation counter
- Alarm set points
- LTC temperature and differentials

**BUSHINGS**
- Capacitance current value
- Capacitance alarm set points
- Tan delta value
- Tan delta alarm set points
- Temperature value
- Temperature alarm set point
- Leakage current value and set points

**CONSERVATOR TANK**
- Liquid level
- Buchholz relay
- Bladder rupture alarm

**MAIN TANK**
- Temperature
- Pressure relief
- Rapid pressure rise relay
- Liquid level
- Smart breather
- 3rd party smart sensors

**WINDINGS**
- Fiber optic winding temperature
- Simulated winding temperature
- Partial Discharge (PD)
- Dissolved Gas Analysis (DGA)
- Geomagnetically Induced Current (GIC)

**COOLING MONITORING**
- Motor current power and motor run time
- Alarm set points
- Cooling bank temperature and differentials
- Flow indicator status
- Efficiency status
Modular Platform

Field upgradeable, hot swappable modules

- All modules are isolated from one another. Each is engineered to be hot swappable and fully field upgradeable to aid in configuration changes
- The web based interface software will automatically recognize hardware changes to reduce installation and commissioning time

**DISPLAY**
- Optional push button display screen
- Large backlit LCD screen
- Integrated overlay buttons

**DIGITAL INPUTS**
- Completely configurable per specification
- 14 digital inputs per module
- Up to 196 digital inputs per system

**FIBER OPTICS**
- Accurate direct winding temperature
- Accurately characterize asset aging
- Available in 4, 6, or 8 inputs

**RELAYS**
- Cooling system activation, alarms and customized signals
- 8 relays per module
- Up to 112 relays available per system

**CPU**
- USB and serial ports; IEC 61850, DNP 3.0, Modbus, IEC 60870 protocols
- Web based interface
- Universal power supply

**ANALOG INPUTS**
- Flexible configuration of multiple analog types
- 8 analog inputs per module
- Up to 112 analog inputs per system

**BUSHING MONITOR**
- Real time monitoring of up to 6 bushing taps per module
- Detect changes in Tan Delta
- Detect changes in capacitance
Module Customization

Simple Installation of Additional Monitoring Technologies

- Qualitrol offers a wide variety of modules to populate the various sizes of QTMS chassis
- Any module configuration may be chosen, and module changes are auto-recognized by the QTMS software

Modules easily slide in and out of the chassis to create custom configurations

Chassis Customization

STX Chassis
- Optional remote display
- Houses up to 4 modules
- Generally used for traditional transformer monitoring or specialty applications

MTX Chassis
- Optional remote or internal display
- Houses up to 7 modules
- Generally used for traditional monitoring plus some advanced functionality such as Fiber Optics, DGA or Bushing Monitoring

LTX Chassis
- Optional remote or internal display
- Houses up to 14 modules
- Generally used for advanced CBM transformer monitoring:
  - Traditional monitoring / LTC / Cooling
  - Bushing Monitoring
  - Dissolved Gas Analysis (DGA)
  - Partial Discharge (PD)
  - Fiber Optic Temperature

Mounting options
- A variety of mounting options are available with the QTMS. Including panel mount, rack mount, and various enclosures
Product Advantages

**Customization and Configuration**
- Modular approach customizable to any CBM platform; traditional monitoring plus DGA, PD, Bushing Monitoring
- Choose a unique combination of monitoring parameters and health algorithms for various sized transformers
- All modules are backward compatible and can be added or subtracted at any time with simple configuration
- Fully field configurable by the end user with web based software that can be accessed on or offline
- No need for constant manufacturer technician support on installation or configuration changes!

**Installation and Reliability**
- Universal power supply with wiring on the front of the unit for easy access

**Software and Algorithms**
- Web based software can be accessed locally or remotely depending on the application
- Configuration of sensors, alarms, and modules are simple and intuitive with just a few mouse clicks
- Incorporation of state of the art health assessment algorithms
- Algorithms are based on IEC and IEEE standards that are well accepted in the industry

**Transformer Fleet Monitoring**

**SmartSUB Enterprise Software**
- Bring data from multiple QTMS units into a centralized location with Qualitrol’s SmartSUB enterprise software
- Show data on an individual asset level, regional view, or consolidated fleet wide look

QUALITROL® Field Services
QUALITROL® provides on-site commissioning/start-up and comprehensive maintenance contracts to all customers worldwide. To further improve reliability, an extended warranty is available on selected products commissioned by QUALITROL®.

About QUALITROL®
Established in 1945, with continual improvement at the core of our business, QUALITROL® provides smart utility asset condition monitoring across the globe. We are the largest and most trusted global leader for partial discharge monitoring, asset protection equipment and information products across generation, transmission and distribution. At QUALITROL®, we are redefining condition monitoring technology for Electric utilities assets.
